ITHACA LANDMARKS PRESERVATION COMMISSION (ILPC)

NOTICE OF MEETING & AGENDA

The regular monthly meeting of the ITHACA LANDMARKS PRESERVATION COMMISSION will be held at **5:30 p.m., Tuesday, March 17, 2026**, in Common Council Chambers, Third Floor, City Hall, 108 E. Green Street, Ithaca, NY. This meeting is open to the public and will be held in Common Council Chambers, Third Floor, City Hall, 108 E. Green Street, Ithaca, NY, and also conducted remotely using videoconferencing technology. Virtual participation in public meetings is authorized by Part WW of Chapter 56 of the Laws of 2022 of New York State and Local Law 2022-05. More information, including the written procedures governing the use of videoconferencing technology, is available at <http://www.cityofithaca.org/339/Boards-Committees>.

For remote viewing/attendance: A live stream of the proceedings is available at https://www.youtube.com/channel/UC7RtJN1P_RFaFW2IVCnTrDg ; a recording will be made available through the same link following the conclusion of the proceedings. If you are a member of the public wanting to observe the meeting, please simply watch the live stream. If you are an applicant or member of the public wishing to comment during the proceedings, you should both follow the meeting via the live stream and join the meeting via Zoom. (You will be placed in a waiting room until your allotted time to speak.) Members of the public wishing to be heard are strongly encouraged to register by 3:00 PM on the day of the meeting. To register, please send your name and physical address to planninginfo@cityofithaca.org, subject line: “ILPC Speaker Registration – March 2026”. Written comments may be submitted to the aforementioned email address no later than 3:00 p.m. on the day of the meeting. Use the subject line: “ILPC Comments – March 2026,” and include your legal name and physical address along with your comments in the body of the email. Each comment is limited to three minutes and will be read aloud at the meeting.

I. PUBLIC HEARINGS

- A. **219 South Albany Street, Henry St. John Historic District** — Proposal to Demolish a Contributing Single-Car Garage and Construct a New One.

II. PUBLIC COMMENT ON MATTERS OF INTEREST

III. OLD BUSINESS

- A. **103 Spring Lane, East Hill Historic District** — Proposal to Replace a Wood Garage Door with One Fabricated in Metal, with Other Changes in Panel Design and Glazing.

IV. APPROVAL OF MINUTES

- A. November 2025
- B. January 2026

Out of consideration for the health of other individuals, please try to refrain from using perfume/cologne and other scented personal care products at City of Ithaca meetings. Thank you for your cooperation and understanding.

If you have a disability and would like specific accommodation in order to participate, please contact the City Clerk's Office at 274-6570 by 12:00 p.m., no later than 2 days (not including weekends and holidays) before the meeting.

V. ADMINISTRATIVE MATTERS

- A. Review: Staff-Level Review Report
- B. Review: 2025 Annual Report to Mayor and Common Council

VII. ADJOURNMENT

ACCESSING ONLINE MEETING MATERIALS:

Online meeting materials, like applications for a Certificate of Appropriateness and supporting materials, are available electronically via the "Document Center" on the City web site (www.cityofithaca.org/DocumentCenter), under "Ithaca Landmarks Preservation Commission" > "Applications for Certificates of Appropriateness" and in the relevant year/month folder. Please do not hesitate to contact our office if you have any questions or you need any assistance accessing the meeting materials. You are also always welcome to visit the Planning Division at any time during regular office hours (8:30-4:30, Mon.-Fri.) to view original hardcopy materials.

RESOLUTION: 219 South Albany Street, Henry St. John Historic District - Proposal to Install a 6' Wood Fence.

WHEREAS, 219 South Albany Street is located within the Henry St. John Historic District, as designated under Section 228-3 of the City of Ithaca Municipal Code in 2013, and

WHEREAS, as set forth in Section 228-4 of the Municipal Code, an Application for a Certificate of Appropriateness, dated May 15, 2025, was submitted for review to the Ithaca Landmarks Preservation Commission (ILPC) by property owner Andrew Foster, including the following: (1) two narratives respectively titled Description of Proposed Change(s) and Reasons for Changes(s); (2) six photographs documenting existing conditions; (3) a document dated March 5, 2026 and titled “219 S. Albany St. Garage Replacement Specifications; and (4) drawings and sketches of the proposed garage, including a “Plan View,” “West Elevation,” “Alternate Gable – Draft,” “North Elevation,” “South Elevation,” “East Elevation,” “Section of South and West Wall,” “Trim Detail at Corners,” and “Watertable Trim Boards,” and

WHEREAS, the ILPC has reviewed the entry in the annotated list of properties included within the Henry St. John Historic District for 219 South Albany Street, and the City of Ithaca’s Henry St. John Historic District Summary Statement, and

WHEREAS, as stated in the narrative Description of Proposed Change(s), the project involves the demolition of the property’s contributing single-bay, single-story, shed-roofed garage and the construction of a 24’x12’, single-bay, single-story, front gable-roofed garage with detailing matching the Stick-Style residence., and

WHEREAS, the issuance of a Certificate of Appropriateness is a Type II Action under the New York State Environmental Quality Review Act and the City Environmental Quality Review Ordinance for which no further environmental review is required, and

WHEREAS, the applicant (**has/has not**) provided sufficient documentation and information to evaluate impacts of the proposal on the subject property and surrounding properties, and

WHEREAS, a Public Hearing for the purpose of considering approval of the Application for a Certificate of Appropriateness was conducted at the regularly scheduled ILPC meeting on March 17, 2026, now therefore be it

RESOLVED, that the ILPC has made the following findings of fact concerning the property and the proposal:

As identified in the City of Ithaca's Henry St. John Historic District Summary Statement, the period of significance for the area now known as the Henry St. John Historic District is 1830-1932.

As indicated in the individual property entry in the annotated list of properties included within the Henry St. John Historic District, the Stick Style residence at 219 South Albany Street was constructed ca. 1884.

Constructed within the period of significance of the Henry St. John Historic District and possessing a high level of integrity, the property is a contributing element of the Henry St. John Historic District.

As noted in the individual property entry, the subject garage was built between 1919 and 1924 and is considered a contributing element of the historic district. However, the garage's severe deterioration, replacement cladding and trim, and roof modifications have significantly impacted the integrity of the resource. At some point prior to the district's designation, the shed roof structure of the garage was rebuilt and the projecting shed roof on the west elevation was added. The original garage doors were replaced with ones constructed of a panelized-siding material. The building's cladding was also replaced with the same non-historic material. Finally, the garage's documented deterioration appears to have started before the district's designation in 2013.

In consideration of this and all approvals of proposals for alterations, new construction, or demolition in historic districts, the ILPC must determine that the proposed exterior work will not have a substantial adverse effect on the aesthetic, historical, or architectural significance and value of either the landmark or, if the improvement is within a district, of the neighboring improvements in such district. In considering architectural and cultural value, the Commission shall consider whether the proposed change is consistent with the historic value and the spirit of the architectural style of the landmark or district in accordance with Section 228-6 of the Municipal Code. In making this determination, the Commission is guided by the principles set forth in Section 228-6B of the Municipal Code, as further elaborated in Section 228-6C, and by the Secretary of the Interior's Standards for Rehabilitation, and in this case specifically the following principles and Standards:

Principle #2 The historic features of a property located within, and contributing to the significance of, an historic district shall be altered as little as possible and any alterations made shall be compatible with both the historic character of the individual property and the character of the district as a whole.

Principle #3 New construction located within an historic district shall be compatible with the historic character of the district within which it is located.

Standard #2 The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features and spaces that characterize a property will be avoided.

Standard #3 Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historic development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.

Standard #6 Deteriorated historic features shall be repaired rather than replaced. When the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities, and where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

Standard #9 New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

With respect to Principle #2, Standard #2, and Standard #9, the demolition of the existing and construction of a new garage (**will/will not**) remove distinctive materials (**but will/and will not**) alter features and spaces that characterize the property. [**If “will” describe feature or space and how it will be inappropriately altered**]

With respect to Principle #2 and Standard #6, as shown in the submitted photographs and observed by ILPC staff, the severity of the deterioration of the garage requires its replacement. The proposed new work will not match the old in design, color, texture, material and other visual qualities. **Additional language needed: Why is the design acceptable or not..**

Also with respect to Principle #2, (Principle #3), and Standard #9, the proposed new garage (**is/is not**) compatible with the massing, size, scale, and architectural features of the property and its environment. [**if “not”, describe qualities of the project that are not compatible and in what ways they are not**]

RESOLVED, that, based on the findings set forth above, the proposal (**will/will not**) have a substantial adverse effect on the aesthetic, historical, or architectural significance of the Henry St. John Historic District, as set forth in Section 228-6, and be it further,

RESOLVED, that the Ithaca Landmarks Preservation Commission determines that the proposal (**meets/does not meet**) criteria for approval under Section 228-6 of the Municipal Code, and be it further

RESOLVED, that the ILPC (**approves/denies**) the Application for a Certificate of Appropriateness.

RECORD OF VOTE:

Submittal Requirements

All documents are to be sent to the attention of Bryan McCracken at the above address.

STAFF-LEVEL REVIEW:

Submit one (1) hardcopy and one (1) electronic copy of application and attachments. See *City of Ithaca Historic District & Landmark Design Guidelines* for a description of work that is eligible for this expedited review process.

ILPC REVIEW:

Submit eleven (10) hardcopies and (1) one electronic copy of application form and all attachments. Complete applications must be received by 4:00 p.m. on the last Tuesday of the month, 21 days prior to the regular ILPC meeting at which the application will be reviewed. ILPC meetings are held the third Tuesday of each month.

Applications must be accompanied by *thorough* documentation of existing conditions and proposed changes, including (as applicable): photographs of existing conditions; site plans showing location and dimensions of proposed change; drawings or sketches showing proposed changes on each affected elevation; description of design details and materials to be used (manufacturer's data sheets may be used); samples of proposed materials; scale drawings of any proposed signs including colors, typeface, and illumination details; historic photographs, if the intention of the project is to return a property to a documented prior condition; and a statement from a qualified contractor or design professional attesting to the physical condition of any element that is proposed for replacement due to deterioration.

219 S. ALBANY ST. GARAGE REPLACEMENT

REASON FOR PROPOSED CHANGES:

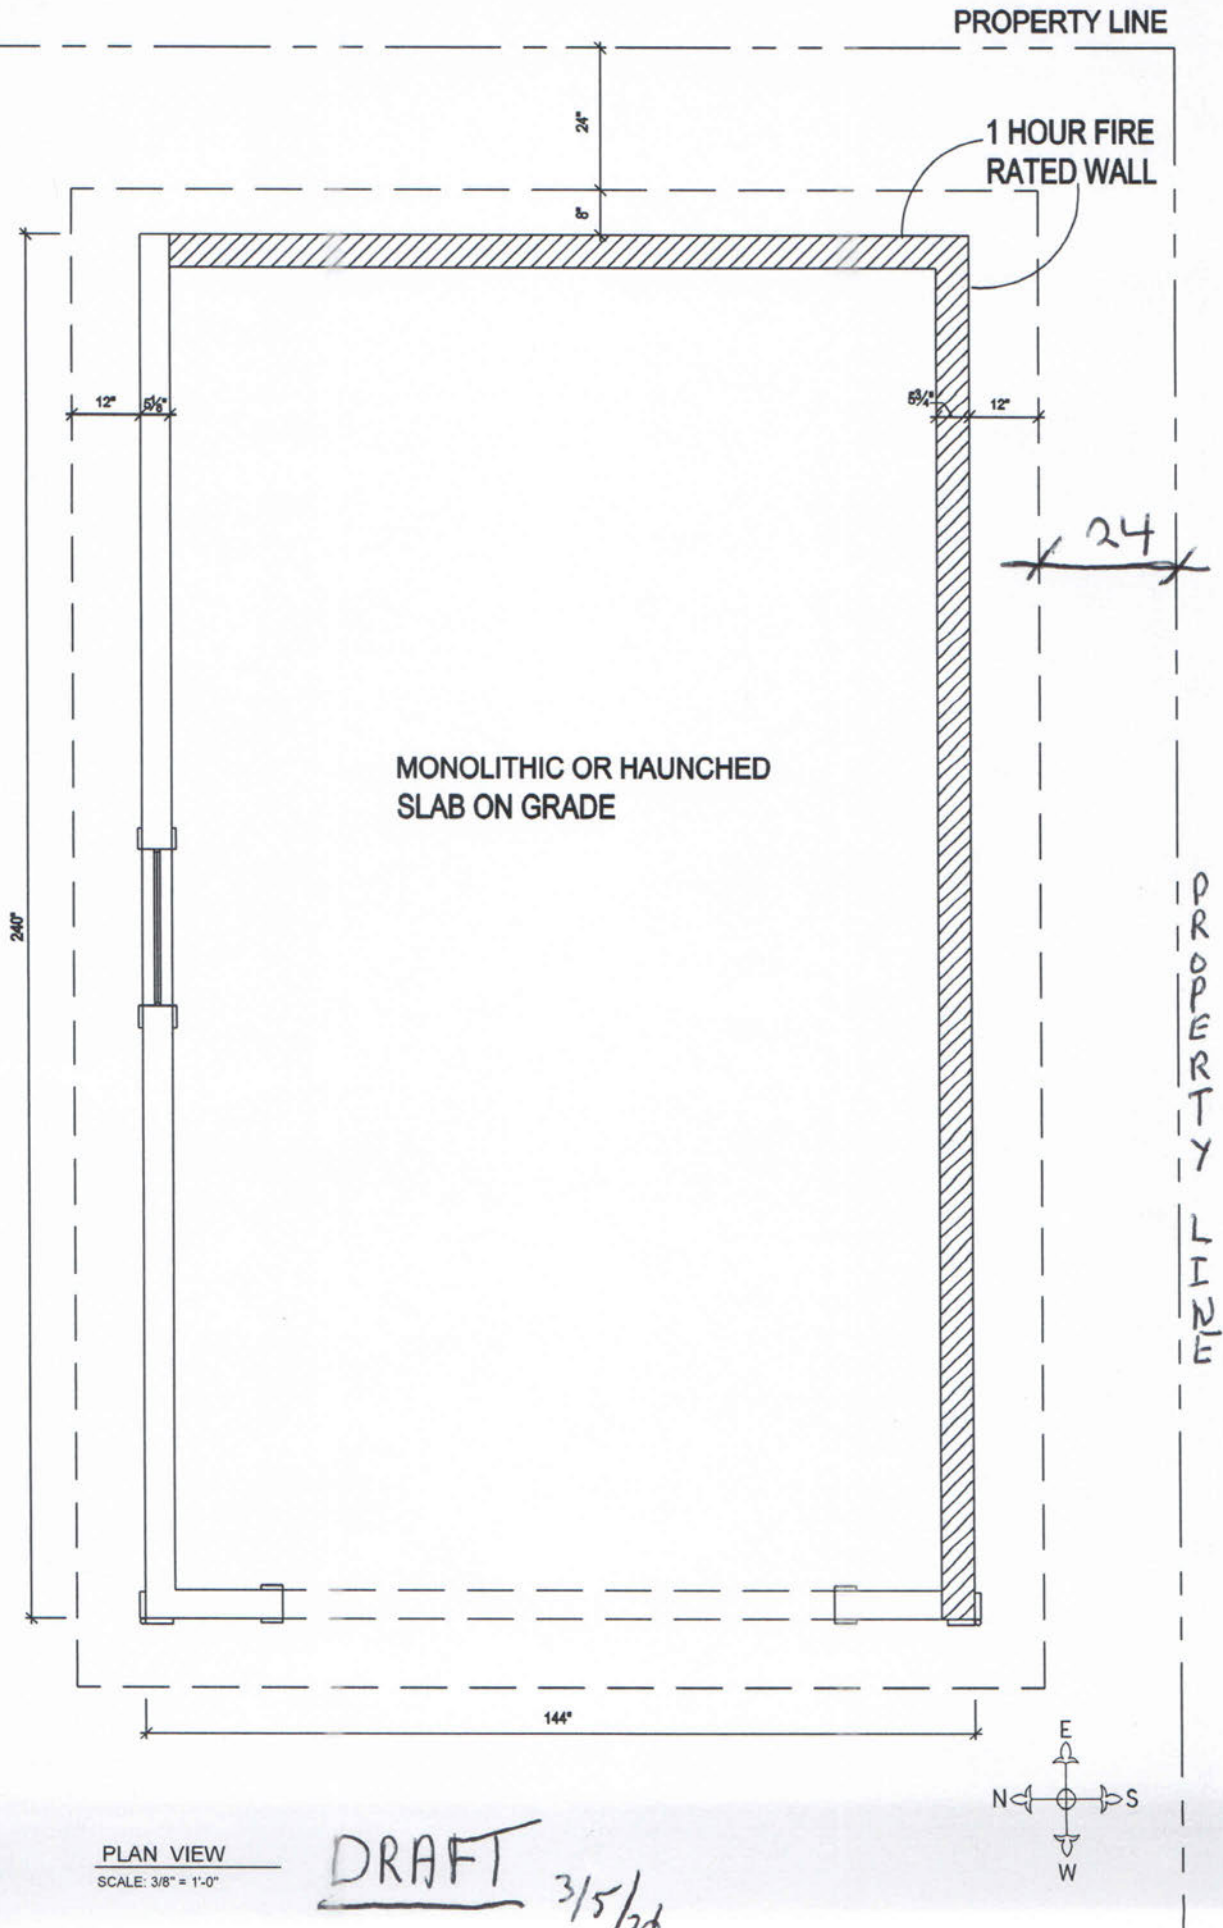

In short, the primary reason for changes is that our present garage is slowly falling down. Its demise was mainly caused by the contact of a giant silver maple tree. Although the ailing tree was cut down 10 years ago the path towards collapse did not cease. I have a contractor lined up and had an asbestos audit performed with a negative result. We are ready for our contractor to seek a demo permit. It would be great to have the structure torn down and removed together with its failing slab before the surrounding ferns and Hosta's emerge.

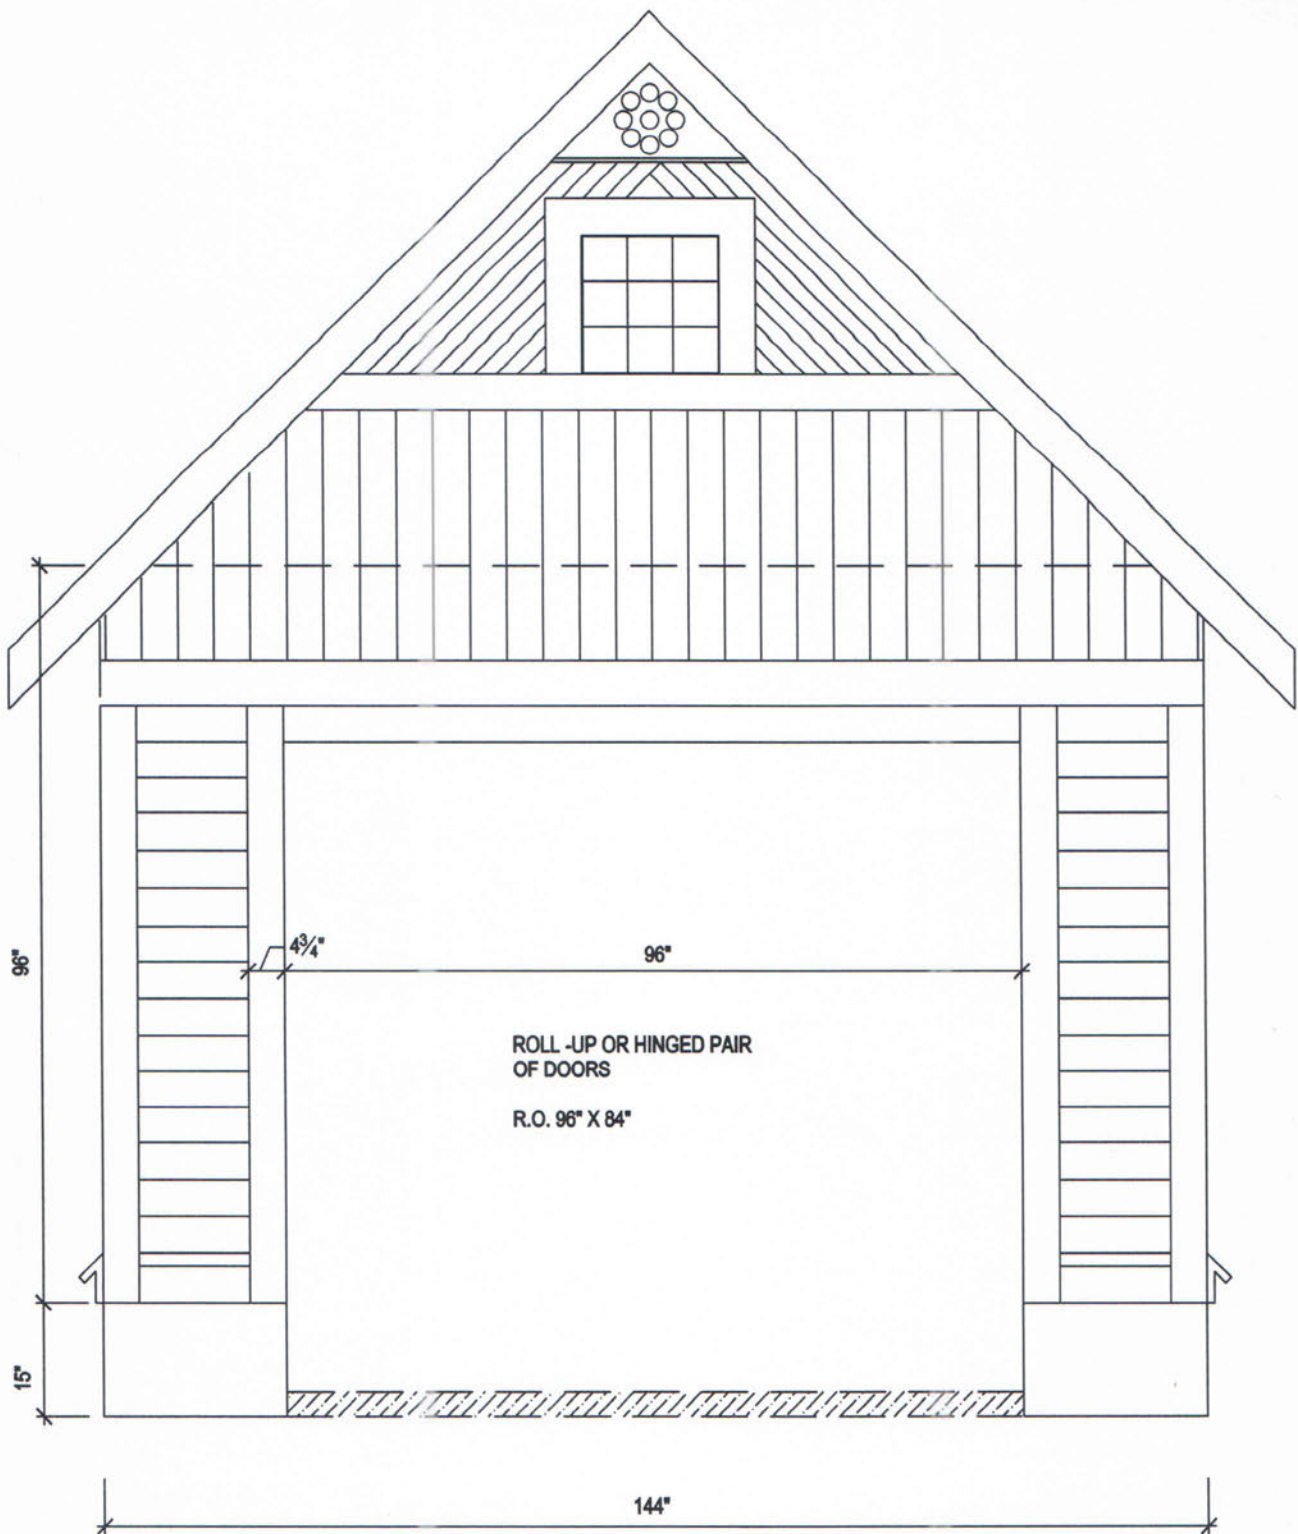

DESCRIPTION FOR PROPOSED CHANGES:

We want to replace this structure with a new one of the same footprint but repositioned slightly so to conform to current setback requirements. The design aesthetic is for the new structure to read as a sibling of our 1884 Stick style/Eastlake Victorian. I was initially inclined to detail it as miniature clone of the house but since have realized that would not be appropriate for an auxiliary structure. A 12/12 pitch roof together with reproducing trim details, using ornamental design details from our house gables and using the same paint scheme as the house will go a long way towards that end. The gable window will be an extra one from the house and the only other window will be sourced from architectural salvage. The tongue and groove paneling in the gable will be architectural salvage as well.

219 S. ALBANY ST. GARAGE REPLACEMENT SPECIFICATIONS

- East and South wall 1 hour fire rated, see detail, fire blocking installed between top plate and sub-roof.
- North wall window, size T.B.D. sourced from architectural salvage
- West wall gable window, sourced from main house, 219 S. Albany
- front (west wall) door, T.B.D., either swinging pair or roll-up.
- siding, James Hardie HZ5 fiber cement lap, with 4.75" exposed to match main house
- corner trim (see detail), window and door casings, 1"x4.75", actual, thermally treated ash, oak or poplar or fiber cement.
- water table trim (see detail) same material as above
- tongue and groove paneling in west gable sourced from architectural salvage.
- all walls are kiln dried nominal 2x4 SPF with 5/8" CDX sheathing on exterior and 5/8" type "X" MR on interior. East and south wall have an addition layer of 5/8" Type "X" MR on exterior.
- roof is constructed of 2x6 SPF rafters and collar ties on 24" centers and 1/2" CDX sub-roof and either a 25 year fiberglass single or sheet steel

219 South Albany Street

ca. 1884

Description:

219 South Albany Street is located mid-block on a double-width lot on the east side of the street, occupying the largest lot on the 200 block of South Albany Street. The house is located in the southwest corner of the large lot. The house is a two-and-a-half-story wood frame house built ca. 1884 in the Queen Anne Style. It has a hipped roof with lower cross gables that create full-height projections at the north, west, and south façades. The house is clad in primarily in clapboard with

wood corner boards and sits on a raised stone foundation. Windows are primarily 2/2; they appear in pairs centered in the gable ends, and singly on the rest of the house.

Gables feature carved vergeboards and tripartite windows under the gable. The tripartite windows have center pentoid windows flanked by lower rectangular windows. Gable ends are clad in horizontal flushboards with a wide band of vertical boards above a stringcourse capping the second story.

The west, primary, façade has a shed roof porch covering the entrance at the north corner and a shed roof porch on the south corner. Both porches feature decorative posts and a low balustrade with a cutout pattern. There are two shallow, shed-roofed, projecting bays on the north façade. The west bay is clad in vertical board with paired windows on its north side.

A gravel driveway runs from the street to a small, one-bay, garage in the southeast corner of the lot. A hedgerow separates the sidewalk from the large lawn occupying the north half of the lot.

Significance:

Contributing. Architecturally significant. Garage contributing and architecturally significant.

219 South Albany Street is architecturally significant as an excellent example of an early Queen Anne style house that incorporates elements of the Stick style in its verticality and abundant detailed wood decoration. The house retains a high level of architectural integrity. The small garage in the southeast corner was constructed between 1919 and 1929 and retains its architectural integrity as an example of an early automobile garage.

The lot is a combination of western parts of lots 27 and 28 of the lots laid out south of Green Street by Simeon DeWitt. These lots originally ran from South Geneva Street to South Albany, with a the house on each lot fronting South Geneva Street and barns or carriage houses located at the rear of the lots along South Albany Street. Houses were built on the Geneva Street sides of the lots prior to 1851; these are now 216 and 220 South Geneva Street.

Charles M. Titus purchased lot 28, the southern lot, in 1871. He had already owned the property a few years earlier, then conveyed it to Charles E. Hardy in 1868. It was not unusual for properties in the Henry St. John district to change owners frequently, and many of the property transfers were among major landowners and business associates such as Titus and Hardy. Titus sold the lot to Oristus Gregory in 1872. Gregory purchased the lot to the north in 1881 and combined the two before selling the western half of the combined lots to Thomas G. Miller in 1884 for \$5,500. It is possible that Gregory constructed the house prior to selling the property to Miller because the construction of speculative houses was common in the neighborhood.

Thomas G. Miller was a partner in Enz & Miller, a wholesale paper and stationary business founded in 1878. Prior to forming their own firm, the men worked for the Andrus & McChain printing company. Miller later formed T.G. Miller & Sons paper company, a business that operated through the 1990s. The Miller family retained ownership of 219 South Albany Street until 1987.

Alterations:

Sanborn company maps indicate that a small one-story porch was added to the north corner of the east façade between 1904 and 1910. The current owners constructed the small one-story bay addition near the east corner of the north façade in 2001.

RESOLUTION: 103 Spring Lane, East Hill Historic District - Proposal to Replace a Wood Garage Door with One Fabricated in Metal, with Other Changes in Panel Design and Glazing

WHEREAS, 103 Spring Lane is located in the East Hill Historic District, as designated under Section 228-3 of the City of Ithaca Municipal Code in 1988, and as listed on the New York State and National Registers of Historic Places in 1986, and

WHEREAS, as set forth in Section 228-4 of the Municipal Code, an Application for a Certificate of Appropriateness, dated December 19, 2025, was submitted for review to the Ithaca Landmarks Preservation Commission (ILPC) by property owner Alicia Freedman, including the following: (1) two narratives respectively titled Description of Proposed Change(s) and Reasons for Changes(s); (2) a photograph documenting existing conditions; (3) rendering of the proposed alteration; and (4) product information for the proposed material, and

WHEREAS, the ILPC has also reviewed the New York State Building-Structure Inventory Form for 103 Spring Lane, and the City of Ithaca's East Hill Historic District Summary Statement, and

WHEREAS, as stated in the narrative Description of Proposed Change(s), the project involves the replacement of a wood, 16-flat-panel, garage door with two four-light windows with an aluminum, 16-raised-panel, garage door without windows, and

WHEREAS, the issuance of a Certificate of Appropriateness is a Type II Action under the New York State Environmental Quality Review Act and the City Environmental Quality Review Ordinance for which no further environmental review is required, and

WHEREAS, the applicant (**has/has not**) provided sufficient documentation and information to evaluate impacts of the proposal on the subject property and surrounding properties, and

WHEREAS, a Public Hearing for the purpose of considering approval of the Application for a Certificate of Appropriateness was conducted at the regularly scheduled ILPC meeting on January 20, 2026, and

WHEREAS, at the conclusion of the Public Hearing, the Commission made a finding of fact that the circumstances of the application required further time for additional study and information, and tabled the consideration of the proposal, and

WHEREAS, revised Certificate of Appropriateness Application materials were submitted by the applicant on March 11, 2026, including three options for the proposed replacement garage door, now therefore be it

RESOLVED, that the ILPC has made the following findings of fact concerning the property and the proposal:

As identified in the City of Ithaca's East Hill Historic District Summary Statement, the period of significance for the area now known as the East Hill Historic District is 1830-1932.

As indicated in the New York State Building-Structure Inventory Form, the Colonial Revival Style house at 103 Spring Lane was constructed between 1904 and 1910

Constructed within the period of significance of the East Hill Historic District and possessing a high level of integrity, the property is a contributing element of the East Hill Historic District.

Constructed between 1919 and 1924, the property's attached garage is a contributing element of the East Hill Historic District; however, the garage door does not appear to be original. Based on the hardware, the subject garage door was likely manufactured by The Crawford Door Co. This company was founded in the Midwest in 1930. As this company was founded after the completion of the property's garage, the existing garage door is not original and was likely not installed during the district's period of significance. The garage door is, therefore, considered a non-historic building element.

In consideration of this and all approvals of proposals for alterations, new construction, or demolition in historic districts, the ILPC must determine that the proposed exterior work will not have a substantial adverse effect on the aesthetic, historical, or architectural significance and value of either the landmark or, if the improvement is within a district, of the neighboring improvements in such district. In considering architectural and cultural value, the Commission shall consider whether the proposed change is consistent with the historic value and the spirit of the architectural style of the landmark or district in accordance with Section 228-6 of the Municipal Code. In making this determination, the Commission is guided by the principles set forth in Section 228-6B of the Municipal Code, as further elaborated in Section 228-6C, and by the Secretary of the Interior's Standards for Rehabilitation, and in this case specifically the following principles and Standards:

Principle #2 The historic features of a property located within, and contributing to the significance of, an historic district shall be altered as little as possible and any alterations made shall be compatible with both the historic character of the individual property and the character of the district as a whole.

Standard #2 The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features and spaces that characterize a property will be avoided.

Standard #6 Deteriorated historic features shall be repaired rather than replaced. When the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color,

texture, and other visual qualities, and where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

Standard #9 New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

With respect to Principle #2, Standard #2, and Standard #9, the replacement of the garage door **(will/will not)** remove distinctive materials **(but will/and will not)** alter features and spaces that characterize the property. **[If “will” describe feature or space and how it will be inappropriately altered]**

With respect to Principle #2 and Standard #6, as described by the applicant, the severity of the deterioration of the wood garage door requires its replacement. The proposed new work **(will/will not)** match the old in design, color, texture, and other visual qualities. **[if material will not match, explain why not and why that’s acceptable].**

Also with respect to Principle #2, and Standard #9, the proposed aluminum garage door **(is/is not)** compatible with the massing, size, scale, and architectural features of the property and its environment. **[if “not”, describe qualities of the project that are not compatible and in what ways they are not]**

RESOLVED, that, based on the findings set forth above, the proposal **(will/will not)** have a substantial adverse effect on the aesthetic, historical, or architectural significance of the 103 Spring Lane and the East Hill Historic District, as set forth in Section 228-6, and be it further,

RESOLVED, that the Ithaca Landmarks Preservation Commission determines that the proposal **(meets/does not meet)** criteria for approval under Section 228-6 of the Municipal Code, and be it further

RESOLVED, that the ILPC **(approves/denies)** the Application for a Certificate of Appropriateness with the following condition(s):

FROM THE PAGES OF HISTORY

Crawford Door Company

A sign used in
Pittsburgh, 1955

Hoover Road Plant in Detroit, 1953

President Bob Hackathorn (right) along with Dave Crawford (left) received the Distinguished Merchandising Award Plaque from Harold Mann of American Builder Magazine, 1954.

Crawford Door's
1953 Conference

Milestones

- 1930 Crawford Door is founded by Fred Crawford and three or four other investors from Thompson Products of Cleveland. The company begins to make garage doors in "a back alley operation" in Detroit, Michigan.
- 1934 The Model SC sectional residential door with torsion spring becomes the standard item. Prior to the SC, the company made one-piece doors and some bi-fold doors. Crawford is recognized as the first to develop the torsion spring door.
- 1937 The company moves into a 12,000-square-foot plant at 5300 St. Jean Street in Detroit.
- 1940 Seeking better shipping facilities, the company moves to a plant at 401 St. Jean.
- 1942 Production is converted to making aircraft parts during the war, ca. 1942-45.
- 1947 Crawford holds their first national sales meeting with 52 distributors in attendance in Detroit.
- 1947 The Magician is first used as the company trademark, and the name of "Marvel-Lift" doors is coined.
- 1949 Crawford's first Distributor Advisory Board is appointed to advise the company's president, Bob Hackathorn.
- 1950 Crawford acquires a plant at 20263 Hoover Road, but doesn't make doors there until 1953.
- 1954 A plant is added at Phillipsburg, New Jersey, to handle eastern hardware shipments.
- 1950s Crawford is widely recognized as the second largest garage door manufacturer behind Overhead Door.
- 1955 The company has 95 distributors in the U.S. and Canada.
- 1959 Fred Crawford retires after creating TRW in 1958, a merger of Thompson Products and Ramo & Wooldridge. TRW became one of the nation's premier defense companies.
- 1960? Crawford builds a plant in Gottenborg, Sweden, and eventually builds a large international presence. Today, Crawford Door is a company in the Swedish Cardo Door Group, operating in more than 30 countries in Europe and Asia.
- 1962 Fred Crawford sells the domestic operations of Crawford Door to Jim Walter Company.
- 1964 Jim Walter Company moves production from Detroit to Ecorse, Michigan.
- 1974 Crawford headquarters moves from Detroit to Tampa.
- 1978 Crawford door manufacturing in Michigan ends.
- 1983 Wayne-Dalton purchases Crawford Door Co. from Jim Walter Corp.
- 1994 Fred Crawford dies at the age of 103.

This is the additional page for the APPLICATION FOR CERTIFICATE OF APPROPRIATENESS

Home Owner Alicia Freedman [REDACTED]

Regarding the 103 Spring Lane garage door replacement

Home Owner's Goal: To find 2-3 replacement 8x7 garage door options that the ILPC will approve that is also durable (ideally with reviews). Wood is too heavy, so we are considering steel doors. We have not seen fiberglass doors available.

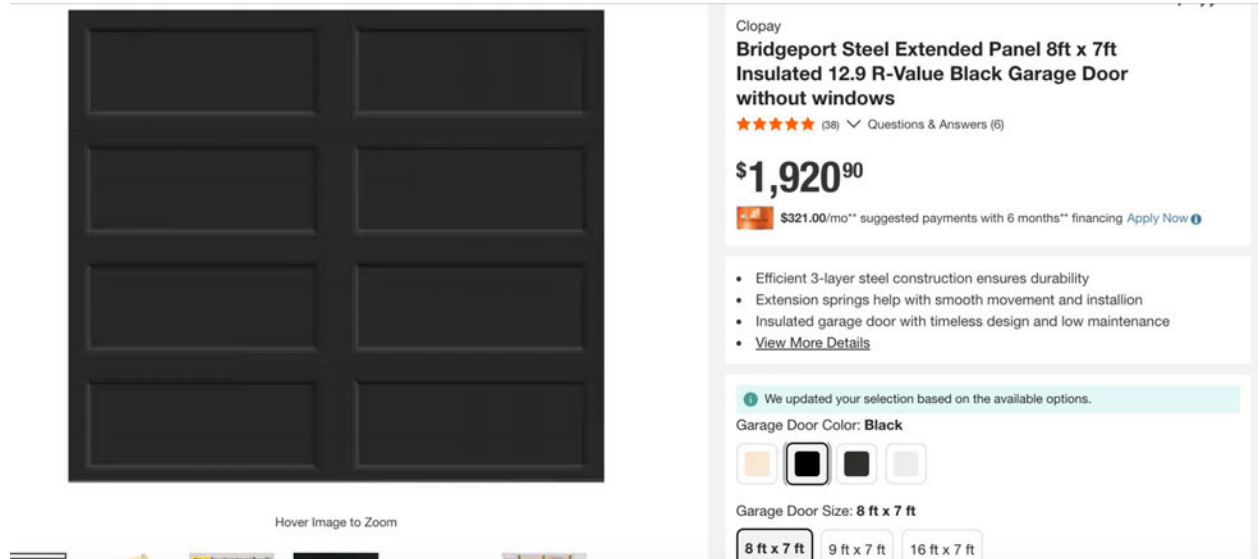

Bryan determined that the previous garage door may have been a Crawford sectional overhead garage door with torsion springs from the 1950s and 60s.

March 2026 Proposed Replacement Door Options:

Hopefully acceptable since these are simpler (less lines), and they do not have raised panels:

1. [Bridgeport Steel Extended Panel](#) (can get in black or white)

2. Coachman doors are our 2nd choice. Some have very poor reviews in terms of durability and delaminating, which would result in an unattractive door and/or another round of deliberation if it needs to be replaced within 10 years by another door that is more durable. It is hard to find reviews on the Coachman doors. These doors are available through Clipay, but are not viewable directly on the Home Depot site. You need to go down quite a path to get to the images of the doors:
 - a. <https://www.homedepot.com/> ,
 - b. scroll to the bottom to "[Installation & Services](#)".
 - c. "[windows and doors](#)".
 - d. "[Garage door and opener installation](#)"
 - e. "[Garage door](#)" and enter zip code
 - f. Select Home Depot in Ithaca
 - g. [Residential garage doors and openers](#)
 - h. Single car garage door
 - i. Coachman
 - j. [View door only](#)

This door may be acceptable but has very bad reviews:

<https://www.homedepot.com/p/Clopay-Coachman-Linear-Design-8-ft-x-7-ft-Insulated-6-5-R-Value-White-Garage-Door-with-SQ24-Windows-GDU507/339550418>

Possibly acceptable but we cannot get it in Ithaca:

1. [Clopay Canyon Ridge Collection Ultra Grain Garage Door](#) (no reviews) - could be compatible if we are willing to paint it. Need to look for reviews - This company requires that they install the door and they only do that in NJ and Philly.

Most likely not acceptable:

2. [Gallery Short Panel Door](#) (great reviews) - a lot busier. Not likely to be accepted
3. [Classic Collection 8 ft. x 7 ft. Intellicore R12. 9 Insulated White Garage Door with Insulated Windows](#) (great reviews) - a lot busier. Not likely to be accepted
4. [8x7 Amarr Hillcrest 1000 Carriage House Garage Door - White](#) (no reviews on that site)
5. [Amarr Classica Carriage House Garage Door](#) (no reviews)

Home owner's questions Bryan answered over the phone March 10:

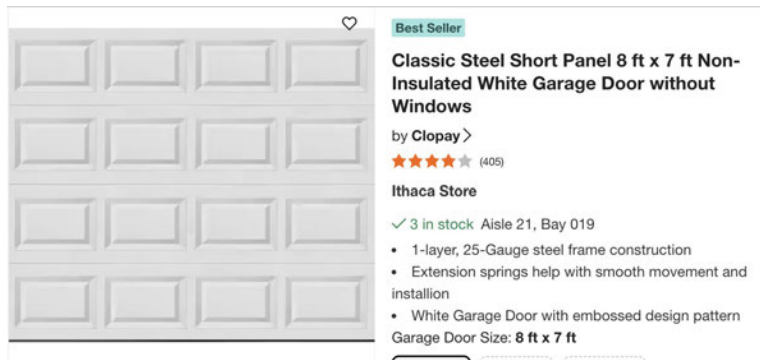

1. The ILPC declined the door I proposed in January: "[Clopay](#) Classic Steel Short Panel 8 ft x 7 ft Insulated 6.5 R-Value White Garage Door without Windows". What features of this door made it unacceptable? This door seemed like the closest match to the door that was there before in terms of panels, etc.
2. Does the replacement garage door need to have windows in order to be acceptable to the ILPC? Not necessarily (existing door had glazing, but there were garage doors from the period without windows)
3. What features make a door compatible with the architecture of the house and garage at 103 Spring Lane? - double door, flat panels, garage doors were simple and meant to look like a garage so people knew a vehicle was in it (status symbol)

House was built in 1904. Attached garage was built between 1919 and 1923. Crawford door company was founded in 1930.

The info below was submitted to ILPC in December 2026

Description of proposed changes:

The wooden garage door was badly broken by yet another person shutting it too hard, was beyond repair and was becoming a hazard. Even when it was not broken, it was not safe for an adult 5'1" (Alicia Freedman) or shorter to open, because the heavy door could not be lodged in the open position and would slide down with people under it. And having glass windows in the garage door of a rental property was also problematic, and they were shattered repeatedly. The owners would like to replace the garage door with the least expensive and most durable option that will work well. If the door below is painted dark purple again like the previous garage door, the change will hardly be noticeable. Here is a door we would like to use: "[Clopay](#) Classic Steel Short Panel 8 ft x 7 ft Insulated 6.5 R-Value White Garage Door without Windows"

The previous garage door was not very noticeable because it was painted dark purple. The garage door faces Glen Place, a short private street with 3 houses on it, all next to 103 Spring Lane (not even across from it). Here is what the house will look like with the proposed replacement door next to the door that was badly broken and removed:

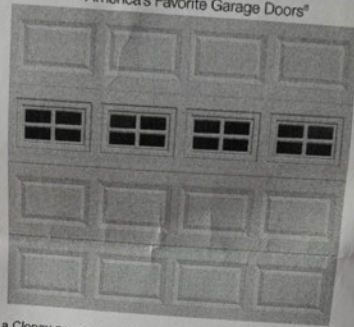

If it is required that the new garage door have windows, this option is also possible:

And in case it comes up, we are still sorry for not realizing that the removal of the 1980s rotting sunroom that had been slapped onto the side of the house needed to be approved before it was removed. Removing that sunroom was a big improvement to the house, and removing the heavy wooden garage door and replacing it with a steel door will also be an improvement in terms of safety.

Because the wooden door was painted dark purple and the new door will be painted the same color, we believe it will not be a significantly visible change to the house.

Re.: 2024 Annual Report of the Ithaca Landmarks Preservation Commission
Date: January 28, 2026

As required by §73-6 of the City Municipal Code, I am pleased to submit the following report concerning the activities of the Ithaca Landmarks Preservation Commission (ILPC) in 2025.

ITHACA LANDMARKS PRESERVATION COMMISSION (ILPC) MEMBERSHIP

Created in 1969, the Ithaca Landmarks Preservation Commission is a seven-member quasi-judicial board comprised of community members who possess a demonstrated interest, as well as professional experience and expertise, in historic preservation. Members serve staggered three-year terms.

Current Members:

Ed Finegan, Chair

Katelin Olson, Member

David Kramer, Vice Chair

Stephen Gibian, Member

Avi Smith, Member

Susan Stein, Member

Janet Smith, Member

Mary Raddant Tomlan, Alternate Member

DESIGNATED HISTORIC RESOURCES

Since the adoption of the first Landmarks Ordinance in 1969, Common Council has designated eight historic districts and twenty-six individual local landmarks, totaling 643 properties, approximately 10% of properties in the city and 6.6% of the City's land area. A map of the City's historic districts is attached.

Historic Districts:

Clinton Block Historic District

Cornell Arts Quad Historic District

Cornell Heights Historic District

DeWitt Park Historic District

Downtown West Historic District

East Hill Historic District

Henry St. John Historic District

University Hill Historic District

Local Landmarks:

Andrus-Whiton House

Andrus, Home Dairy & Firebrand Books Building

Baily Hall

Barnes Hall

Caldwell Hall

Comstock Hall

Delaware, Lackawanna & Western Railroad Station

Delta Kappa Epsilon

Dennis-Newton House

The Eddy Gate

Fernow Hall

The Foundry

Grandview House

Ithaca Calendar Clock Company

Ithaca Gas & Electric Building

Ithaca Masonic Temple

Ithaca Pottery

Larkin Building

Lehigh Valley Railroad Station

Llenroc

Old South Hill School

St. James AME Zion Church

Sage Chapel

Sage Hall

John Snaith House

State Theater

DESIGN REVIEW

As set forth in §73-4 of the Municipal Code, the Ithaca Landmarks Preservation Commission is responsible for the review of proposed changes to the exteriors of locally designated properties. **In 2025, the ILPC held nine regular and two special meetings and reviewed and approved 16 Certificate of Appropriateness applications.**

Under §228-6(c) the Commission may delegate to the Commission's Secretary authority to approve certain types of alterations, including ordinary maintenance and repairs, restorations, in-kind replacements and work that is not highly visible from the public way. **During the reporting period, the Commission's Secretary reviewed 168 permit applications and approved 99; the remaining 69 did not require approval as the proposed work did not include exterior alterations.**

REAL PROPERTY TAX EXEMPTIONS FOR HISTORIC PROPERTIES OR THE "ITHACA LAW" (444A-2)

In 1997, the City of Ithaca became the first New York State community to adopt a tax abatement program for historic properties. In brief, the program provides a ten-year window of tax relief (City and County only) on the increase in assessed value resulting from the substantial rehabilitation of or investment in a structure. Property tax exemptions have been granted to 14 properties in the City's locally designated historic districts since 2000. **In 2025, there were five properties enrolled in this property tax exemption and the total property tax savings for the owners of these properties was \$8,039. Viewed another way, this amount represents the public's investment in the maintenance and rehabilitation of the City's designated historic resources.** Major projects that have utilized this incentive program include the Argos Inn at 408-10 E. State St. in the East Hill Historic District, The William Henry Miller Inn at 303-07 N. Aurora St. in the East Hill Historic District, and the former Red Cross residence at 201 S. Clinton St. in the Henry St. John Historic District.

NEW YORK STATE HISTORIC HOMEOWNERSHIP REHABILITATION TAX CREDIT

This program provides an income tax credit equal to 20% of qualified rehabilitation expenditures, up to a credit value of \$50,000, for owner-occupied properties listed in the State and National Registers of Historic Places. Applying for the credits involves completing a three-part application: Part I certifies the property as being listed in the National Register of Historic Place and eligible for the program; Part II outlines the scope and value of the proposed rehabilitation work; and Part III certifies the completion of the work as proposed and the final cost. Properties within the City's DeWitt Park, East Hill, Cornell Heights, and Henry St. John Historic Districts qualify of this program. **In 2025, eleven (11) property owners completed Parts I and II of tax credit application; the total value of the proposed work was \$482,601. Four (4) property owners completed Part III of the application and were collectively awarded \$37,974 in income tax credits.** The remaining 7 property owners can complete the proposed work and submit Part III of the application this year.

HISTORIC RESOURCE IDENTIFICATION

The Planning Division once again partnered with Cornell University's graduate program in historic preservation planning to conduct a historic resource survey in 2025. The survey focused on the Belle Sherman/Bryant Park neighborhood and is expected to continue for several years.

CERTIFIED LOCAL GOVERNMENT (CLG) ACTIVITIES

The primary goal of the Certified Local Government (CLG) program is to encourage municipalities to develop and maintain community preservation efforts in coordination with local land use planning and improvement activities. Participation in the CLG program allows municipalities to partner with the state and federal governments throughout the processes of identifying and evaluating community resources and protecting historic properties. The City of Ithaca became a Certified Local Government (CLG) on October 10, 1986, and is one of the oldest CLG communities in New York State. As a CLG community, the

City is eligible to apply to the State Historic Preservation Office (SHPO) for funding to conduct preservation-related activities. **In the summer of 2024, the Commission Secretary applied for and received two CLG Sub-grants for a historic resource survey of the DeWitt Park neighborhood and preliminary work needed for a statewide LGBTQ historic context statement. The awards totaled \$54,000. Work on these projects started in early 2025 and will conclude in the second quarter of this year.**

Respectfully submitted,
Bryan McCracken
Secretary, Ithaca Landmarks Preservation Commission

2025 Staff Approvals

BP #	Approval Date	Address	HD or Individual	Scope of Work
B-24-953	1/6/2025	130-130.5 University Ave	University Hill	In-kind roof replacement
B-23-102	1/9/2025	607-611 E State	East Hill	Non-historic window repair and replacement
B-24-850	1/10/2025	407 E Buffao St	East Hill	Remove existing terraced stone walls, excavating down 12" and installing a well compacted base of crushed limestone for a new dry stack stone wall.
ELEC-24-678	1/23/2025	114 Orchard Pl	East Hill	Install heat pump wiring and bathroom heaters
B-25-46	1/31/2025	115 Kelvin Pl	Cornell Heights District	Rebuild 3 site features in original locations with original materials: wood shed, wood fence, wood steps
B-24-943	1/31/2025	519 E State St	East Hill	Emergency replacement of boiler
B-25-59	2/4/2025	301 S Geneva St	Henry St. John	Install skid mounted antenna on the roof to receive internet wirelessly from South Hill.
ELEC-25-75	2/24/2025	202 S Geneva St	Henry St. John	Upgrade Service to 400A, adding range circuit receptacles, outlet for water heater, and rewiring apartment.
ELEC-25-183	4/1/2025	125 Kelvin Pl	Cornell Heights District	Upgrade service from 100A to 200A
B-25-180	4/3/2025	607 E Seneca St	East Hill	Replace water heater
ELEC-25-168	4/3/2025	211 Stewart Ave	East Hill	Upgrade Service to 200A
B-25-212	4/7/2025	309 E Buffalo St	East Hill	Boiler replacement
B-25-178	4/9/2025	106 The Knoll	Cornell Heights District	Remove existing boiler, replace with new LAARS 199 boiler
B-25-221	4/11/2025	612 E Buffalo St	East Hill	Boiler replacement
B-25-224	4/16/2025	319 S Albany St	Henry St. John	Repair back stairs
B-25-201	4/17/2025	411 N Tioga St	Dewitt Park	Installation Lennox ML14XC air conditioning system to replace existing.
ELEC-25-133	4/17/2025	531 E State St	East Hill	Upgrade service from 100 amp to 200 amp, install wiring for kitchen remodel per code

B-25-252	4/18/2025	105 Needham Pl	Cornell Heights District	updated electric and plumbing and insulation. Installation of tile shower and heated tile floor
B-25-158	4/20/2025	329 S Geneva St	Henry St. John	Emergency installation of gas furnace to replace existing.
B-24-549	4/25/2025	210 Stewart Ave	University Hill	Repairs to exterior stucco
B-25-132	4/27/2025	123 S Cayuga St	Individual	In-kind repairs to the exterior, including the Cayuga St entrance canopy
